Health Officer Dr. J. W. Stewart has been notified that the quarantine period of two weeks imposed on children who came to Vermont from New York has been removed, except in the cases of children who have been living in areas that still are infected or who have been exposed to infantile paralysis. Since the epidemic began to approach its height in New York more than four months ago every child coming into Vermont from the Empire state has been required to remain in quarantine for a fortnight and to have its nose irrigated with a solution recommended by specialists. The order to relax the quarantine measure came when health authorities were assured that the epidemic had spent its force for this year. Dr. Stewart states that parents and guardians of children who came to Barre during the summer and early fall months invariably reported immediately upon the arrival of the children.
